REQUIRES: System 6.0.5 or higher. Hard drive required for color version

A-TRAIN CONSTRUCTION SET

YOUR TICKET TO RIDE If you have A-Train™, then adding the A-Train Construction Set gives you a lifetime rail pass. You'll have the total power to build landscapes, place tracks and trains, and develop towns and cities — without any monetary constraints.

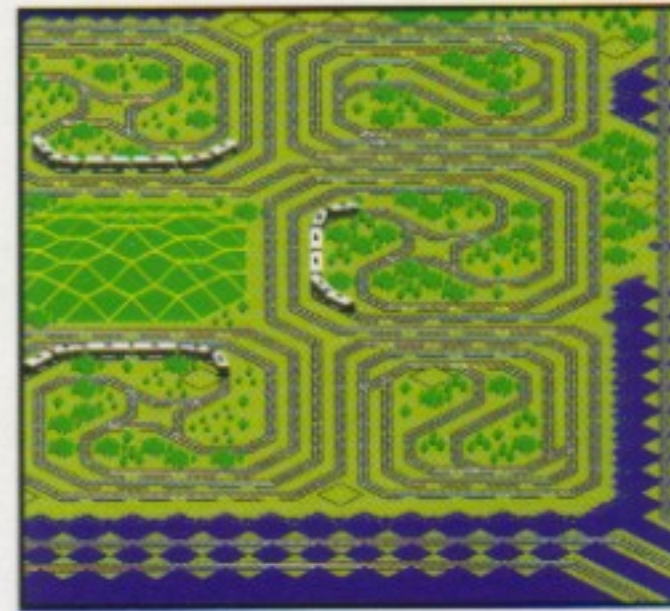

Use any of the included examples as a starting point, or create a landscape and metropolis from scratch. You have absolute control over every patch of ground, every building, every road, train, tree, even every blade of grass. Create new A-Train game challenges for yourself and others.

Totally sculpt both landscape and urban areas. Subsidiary businesses can belong to you or to the simulation.

Paint fields, orchards, rivers and city blocks. Your imagination and ego are your only limitations.

With unlimited tracks and up to 27 trains, you can explore the outer reaches of railroad design.

- Move mountains
- Create rivers, lakes, oceans and islands
- Mark large areas and quickly fill them with fields, orchards, and neighborhoods
- Individually place terrain and property blocks
- Modify A-Train saved games and scenarios
- Add unlimited tracks
- Run up to 27 trains at once
- Test track placement and scheduling
- Use the financial tools to add or remove cash from the game and amass a real estate Dukedom
